Windows 8 Metro Start Menu For PC

Windows 8 Start Screen is a replacement to the Start button, Start menu, taskbar and the classic desktop for Windows 8 users. Though it is a bit more complicated than the classic Start Screen, it is also a lot more customizable and powerful, with the option of using live tiles, which are usually used as a way to see what's happening on the computer right away. Customizable by themes and other visual elements, the Start Screen is also controlled by the new action center, which reveals itself in the top-left corner of the desktop. Like the traditional Start Screen, it hides all unwanted programs, allowing only what you need to run at any given moment. The default theme is transparent (similar to the Start Screen in Windows 8), but you can also choose among six other colors. Installation is simple, and it is possible to save the program to a pen drive in case you want to use it on a computer without a .NET framework. Since it only works under .NET Framework 4.5, it is not compatible with computers that do not have it installed. Windows 8 Start Screen Description: Windows 8 is a new version of Microsoft's Windows operating system, which was released in November 2012 and is currently available for users of 64-bit Windows computers. It is based on the Windows NT kernel and is available in 32-bit and 64-bit versions for computers with a minimum of Windows XP and Windows Vista. Along with other similarities, a big difference between Windows XP and Windows 8 is that Windows 8 is a single, integrated and user-friendly operating system. This is visible in the form of the Windows Live tiles and the new Start Screen, where you don't have to open different programs and tools to complete a certain task. Like its predecessors, this version works under both 32-bit and 64-bit versions of Windows, although some updates to some of the applications are not made for all platforms. Windows 8 Overview Windows 8 looks a lot like Windows 7, but it is not. It sports a new interface, the Start Screen, and a new Start menu that will replace the Start button and the classic Windows desktop. You can, however, switch back to the classic desktop using a hot key. Windows 8 Start Screen The Start screen in Windows 8 is like the Start screen in Windows 7. You can open its
